

WHAT YOU SHOULD KNOW BEFORE YOUR AIRBRUSH TAN

PREPARE:

It's important that you prepare your skin by cleansing, shaving & exfoliating, ideally, right before your appointment. You will achieve the best results with clean, fresh skin.

*If your planning to get a manicure or pedicure soon, you should wait to get your tan AFTER these services are done to ensure your longest lasting tan.

Don't use any products on your skin that would create a barrier against your tan (ie. lotion, face cream, deodorant, etc.)

WHAT TO WEAR:

It's best to wear loose clothing to your visit & throughout the duration of the 4-6hr processing period after your tan. Tight clothing can rub the product off before it fully absorbs in your skin. This can cause imperfections in your tan.

MAINTAIN:

The key to maintaining your tan is to moisturize daily, twice a day would be ideal. Try not to take long, hot showers & avoid using harsh shower gels or body washes that can strip the oils & moisture from your skin.

PROLONG YOUR RESULTS:

To prolong the life of your tan, using Amplify®, a specially formulated fake bake product will not only enhance your tan, but it will boost melanin production allowing your tan to fade evenly while gradually adding pigment & moisture to your skin. Some moisturizers may react with your tan causing it to fade faster or appear "patchy".

FYI'S:

Salt water, chlorine & excessive sweating may cause your tan to fade faster. Waxing, nail services & water related activities should be done prior to your tan. After your tan, the processing period is 4-6hrs, during which time you should avoid sweating or any contact with water.
